

One of my goals is for me to understand the main concepts of accounting.

Another one of my goals is to learn all of the formulas and learn how to execute them properly.

My third goal is to learn what it takes or how to continue accounting after high school.

I've always wanted to learn how to do accounting functions on a calculator/excel.

I want to learn how to multitask and how to use the side number keyboard efficiently.

What I want to get out of Accounting John Doe

I have quite a bit of experience from my dad since he has taken me to work with him many times.
