

Kansas Humane Society

Needs

- I. Employees
- II. Food or Water
- III. Volunteers
- IV. Animals
- V. Equipment (cages, bed stuff, medicine, , grooming equipment, leashes, and toys)

❖ Employees and Volunteers because they need employees/volunteers to help keep the business running, help the customers if they need help, and to help the animals.

❖ Food or Water because sometimes consumers come in there to buy dog food any food or water for their animal, and because they need dog food, cat food, etc. to keep the animals fed and watered that are up for adoption and are staying there or for animals that have been boarded or that are just hungry or thirsty when they're there.

❖ Animals because basically they need pets to keep the business up and to give them good homes, to care for them, and also they also need pets for the ones that are sick they can make them feel better, or a place for them to stay and be safe while their owner is away or not even involved.

❖ Equipment like (cages, bed stuff, medicine, grooming equipment is a need because the workers or consumers need equipment to help care for a dog or any animal to help them survive and be comfortable and live a happy life.

Wants

- I. Donations
- II. More animals
- III. Adopters
- IV. More Equipment (Food, Water, Toys, Leashes, and Medicines)
- V. More Volunteers
- VI. More Consumers

❖ Donations is a want because every business especially a one with dogs sometimes needs donations because they want more money to help feed and nurture the animals that have no home and so they can keep the business running.

❖ More animals is a want so they can help make them feel better and feel loved and to help care for them but they also want more animals so they can keep the humane society business from shutting down and losing their business.

❖ Adopters is a want because at a humane society there is a lot of people who leave their animals because they don't want to take care of them or are stranded and left on the streets and they don't have a home the humane society takes them in cares for them and loves on them and puts them up for adoption so they can find a new and loving home, so they want consumers to adopt them and make them part of their family so the animal will be happy and loved and find a good home and also to make room for the new animals that they are putting up for adoption.

❖ More Equipment is a want because when it comes to animals you can always run out of stuff because the consumers buy them to keep their animals happy so a business if they are running out of stuff will always need to restock on things in this case Equipment to make the consumers, and the animals happy and also to keep the business running.

❖ More Volunteers/Consumers Is always a want for businesses to keep them running and not shut down, they also need volunteers to help them with the business and to help take care of the animals when they need it.

ADOPTING WILL SAVE YOU TIME & MONEY
